Biography

I am a photographer and writer living near Oxford. At the moment I'm studying online courses designed to expand my knowledge of graphic design. As someone always looking for ways to increase my experience, I would love to work others in the local community. I was recently selected to form part of a group of artists exhibiting their artwork at the Autism Arts Festival at the University of Kent in Canterbury. My photographs were an exploration of news reporting culture in the world today.

I author and maintain my own website: davidginn.com, a blog on minimalism that I regularly update, with tips on sustainable living, self-care, artwork, and mindfulness practices. I am a graduate of the University of Hertfordshire with a first class BA (Hons) in Photography. I also have an HNC in Computer Systems Engineering from Greenwich University. In addition to photography, my experience includes working with websites, Photoshop and digital artwork.
